neir own. Improved buying and ad-anced prices in unfinished cotton divi-tions were sustained. Fancy and staple versted prices were raised. Yarn mar-ets reported increased activity. Raw ilk prices gained. Jobbers received acre orders from retailers and other ivisions of the market gave concrete vidence of seasonal progress. Prices in ractically all raw materials advanced and the general spontaneous strength-ming of the markets surprised business agen.

that the factors of the star o

Silk Buying Continues Spotty.

The raw silk market's advance was not reflected in the broad silk market, a which buying continued decidedly spotty. In Scranton and Paterson an attempt made to bring about lower profluction costs by running longer hours and adjusting wage scales was made. Statistics issued on raw silk supplies in the principal warehouses of this city on May 1, showed stocks as lower than they had been at any time since August and 2,000 bales lower than they made to imprincipal warehouses of this city on May 1, showed stocks as lower than they had been at any time since August and 2,000 bales lower than the monthly average for 1921. The trade manifested interest in the Imperial Raw Silk Syndicate of Japan's announcement of its inention to dispose of 2,000 bales of its oldings a month at current prices on the Yokohama market. Considering the silk situation in retrospect, there is undoubtedly a better feeling in the trade of the county of our A. R. English and the results of the results of our A. R. English and the results of the results of the results of the results of our A. R. English and the results of t

they had been at any time since August and 2,000 bales lower than the monthly average for 1921. The trade manifested interest in the imperial Raw Silk Syndicate of Japan'a announcement of its institution to dispose of 2,000 bales of its foldings a month at current prices on the Yokohama market. Considering the six studion in retrospect, there is understoodly a better feeling in the trade is a whole, despite the prevalence of prices which makes finished goods selling time. The slow progress of the tariff bill in the Senate was a general disappointment to the trade. Action was again side traked by other measures and the week found with only two votes having been been on certain relatively unimportant duties on acetic anhydrides. Actual vote on textile duties apparently remained or far away as ever, but there was in the trade a growing crystalization of the trade a growing crystalization of the trade are supposed to the Senate Finance Committees bill and are preparing to be heard in the trade are preparing to be heard in the trade are preparing to be heard in the trade are supposed to the Senate Finance Committees bill and are preparing to be heard in the trade are preparing to be heard in the trade are supposed to the Senate Finance Committees bill and are preparing to be heard in the situation was a suching a crucial stage, Chief in importance was the greating hone of the trade of three more injunctions enjoining a strikers from interfering with the business of the employees of mills affected. The companies were the Dexternance of the English of the trade of the employees of mills affected. The companies were the Dexternance was the greating for the desired of the supportance was the greating to the consistent of the trade of the employees of mills affected. The companies were the Dexternance with the States Finishing Company of Pawtucket and the United States Finishing Company of Foreign the relative providence. Another development of importance was the greating for the deal of the consistent of the supportance

was the first settlement offer tendered to any of the 15,060 workers in Lawrence since the strike began six weeks ago, and provided for a modified cut averaging approximately \$1.5 per cent. Letters brighting members and manufactures are provided for a manufacture and the provided for a manufacture and manufactures are provided for a manufacture and the provided for a manufacture and manufactures are provided for a manufacture and the provided for a

crop conditions in northern areas, leading. Unemployment was said to be on the decrease. Dun's noted a steady improvement in zentiment and unsatisfactory phases were less conspicuous. Wholesale markets were said to be more favorable to sellers and the trend for firmness was considered likely to be carried further. Although doubts about the future have not disappeared, they

TRADE REVIEW AND
BUSINESS OUTLOOK

Broad Movement Spreads Over
Primary Textile Markets
and Buying Improves.

Brown PRICES ADVANCED

Tariff Legislation Delay and Labor Unsettlement Still
Hold Back Recovery.

Not for long have primary textile markets moved as broadly as they did in the last week. They more than held the for own. Improved buying and advanced prices in unfinished cotton divisions were sustained. Fancy and staple worsted prices were raised. Varn markets reported increased activity. Raw alls prices gained. Johneys received was alled to dangerous merchandist and the Middle West. There was a slight seasonal decline of purchases by merchants throughout the country and a slight increase in indebtedness. No great improvement was noted in linit goods lines, trading remaining of nomainal character in practically all of them. Slik hosiery in novelty patterns was quiet except in novelities. Aside from developments in their own trade, buyers regard the activity in financial circles as being the one factor bound to make for steady improvement in their own lines. The impression that the attitude of financiers will lead to a reawakening of the entire industry is general in textile centers. It is apparent, however, that until the farmers recover their purchasing power on an established basis and uncertainties of a new tariff be settled, that any recover their purchasing power on an established basis and uncertainties of a new tariff be settled, that any recover their purchasing power on an established basis and uncertainties of a new tariff be settled, that any recover their purchasing power on an established basis and uncertainties of a new tariff be settled, that any recover their purchasing power on an established basis and uncertainties of a new tariff be settled, that any recovery of trade based on what some consider epeculative advances in raw material will but lead to dangerous merchants.

WEEK END SELLING DEPRESSES COTTON

May Weak During Most of Session Under Liquidation in Quiet Market.

week end sellin gout of long commitments in sufficient volume appeared yeaction on print cloths, shectings and other convertibles. Higher prices were the rule in those fabrics, which caused considerable buying well into June and showed a tendency to go even further ahead if mills would sell. The only apparent hitch to the outlook was the moderate business in finished cloths. There was a slight advance in bleached cottons, a stiffening of gingham prices and a holding of denims for higher prices. The survey of cotton production issued by the Department of Commerce also had a favorable influence on the week's developments and impressed on the trade the very strong statistical position of that staple. Cotton and worsted yarns consistently improved, reports of their increased activity being general.

Of importance to woolen trades was the announcement made by the American Woolen Company of advances averaging 10 to 20 cents a yard in all worsteds. Its action was considered a forerunner of similar advances to be made by other producers. The advances were generally considered a good thing for the market, it being felt that they would have tendency to stiffen weak-ening tendencies. Serges bettered, as evidenced by increased buying activities of factors who have persistently remained short of the market, the question of whether the increases would make selling finished goods more difficult was a much mooted one and a diversity pf opinions was heard. Whatever the final result may be there is no doubt that as a selling stimulant the rise was well calculated.

Silk Buying Continues Spotty.

The raw silk market's advance was for the raw silk market's advance was a given the convertibles. Higher most of the market that they would have tendency to stiffen weak-ening tendencies. Serges bettered, as evidenced by increased buying activities of factors who have persistently remained short of the market. The question of whether the increase and the producers of the convertible of the market. The question of whether the increase and

LAND OF CRUSADES

LAND OF CRUSADES

Correspondent Describes Trip

From Haifa to Border of

French Syria.

London, May 6.—There is no metaled road yet from Haifa to the border of French Syria.

London, May 6.—There is no metaled road yet from Haifa to the border of French Syria.

London, May 6.—There is no metaled road yet from Haifa to the border of French Syria. White as to heart and the sencouraged traffic by the shortest route between Galliee and the "Great Lebanon," as the Beirut Province is now tremed. Such a road would enable tour-ist and traders to reach Beirut in three along detour by rail through Deraa and Damascus to Beirut must take a motor car at Haifa if it is fine. If it has rained heavily he had better face the railway, for unless one has friends at Haifa there is no worse place in Palestine at which to stay. The German hotels on Mount Carmel have been furned into Government offices, and of the Arab hotels in the town—well, least said soonest mended!

There is an excellent motor car service when hot is an excellent motor car service when well depressed in the commercial depression; every one uses seent—society with more discrimination.

turned into Government offices, and of
the Arab hotels in the town—well, least
side somest mended!

There is an excellent motor car service daily between Haifa and Beirut—
weather permitting. It is managed by
a family of New Zealanders settled since
the war at Beirut. One of them is one
of the best drivers on a bad track whom
I have sat behind. Not all the journey
of five hours is interesting.

There are really pretty stretches between Acre and Tyre; black earth plains
ablaze in spring with the characteristic
flowers of Palestine, red anemones,
violet orchids, salmon-pink phlox and
masses of yellow charlock, wild mustard
and penny-cress; rock pools calling you
depths at the foot of the white cliffs and
screens of the "Ladder of Tyre"; the
snowy shoulder of Mount Hermon always to your right as you drive northward. But after Tyre there is little to
see. The bare foothilly of Lebanon shut
out Hermon from your sight; the strip
of coastal plain grows marshy in places
and suggests malaria; Sidon's historic
past does not atone for a Levantinized
when you speed through its orchards

times abused. Tollets among the
Ciristians are expensive—in spite of the
commercial depression; every one uses
scent—socicty with more discrimination
than the masses, who bedew themselves
with alarmingly violent scents, jasmino
